Amicus
The Community App

An app built by
Nils Theres, Luc Lehmkuhl, Matei Grosu, Lawrence Köhler, Joel Sebastian and Carl Rix

**Simple modern Design inspired by Apple's own Apps. Homepage view for quick overview**

Post a help request in a variety of categories and receive help from our growing community of experts. This app welcomes any users and their problems. Together any problem can be solved!
This app was designed with SwiftUI and uses Loopback 4 and a postgreSQL database for the backend.

Create request for a variety of categories so that your problem can be fixed in no time. Add a picture to show your issue in detail. With specifying the coordinates an Expert can visit you to help you in person

Dark Mode compatible
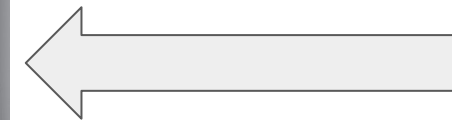

Review your requests in the history tab

Become an expert and help other users with their problems
